

## ::: UPS M-100

### **Description:**

Is a universal silicone-free polishing paste for making a surface consisting of polyester, plastic or metal shine and lustre. Particularly suitable as a final treatment after cleaning. Contains a fine and ultra fine grain that also removes fine scratches.  
Available in 1 kg packaging.

### **Application:**

As a deep cleaner for polyester, plastic and metal.

### **Data on delivery:**

Color:	grey-white
Viscosity:	20000 mPas
Mass density:	approx. 1.3 gr/cm <sup>3</sup>
Shelf life:	At least 6 months in closed packaging
Consistency:	paste

### **Technical data:**

Consumption:	+50 gr/m <sup>2</sup>
Shore:	not applicable

### **Processing:**

Always ensure a dry and grease-free surface. Apply the paste with a soft cloth in circular movements and polish thoroughly with light pressure. Remove the paste residues with a cloth and let the surface shine. Repeat the process if necessary. Is ideal to be processed by machine, but beware of too high a speed (max. 1800 TPM with a polishing fleece - diameter 18 cm). Constantly change the position of the fleece so that the surface does not become too hot.  
Do not let the polishing paste dry out.

### **Safety:**

Always wear suitable gloves and protective clothing. Keep out of reach of children. Cleaning agent for tools: water and soap and for hands: hand cleaner Slig (soap Stockhausen).
