

::: Cleaning Agent M

Description:

Cleaning agent specially developed for the removal of uncured resin residues in the manufacture of mouldings consisting of polyester, polyurethane or epoxy. Cleaner M is hardly toxic, has a low VOC content, is environmentally friendly and biodegradable. This cleaner is not irritating to the skin. Available in 1 lt, 5 lt, 25 lt, 210 kg and 1,000 kg packaging.

Application:

As a universal cleaner for polyester, epoxy, silicone and polyurethane. Can also be used as a thorough cleaner for removing resin residues on tools. Does not stick to the surface as acetone does. Can also be used as cleaning product for one-component paints.

Data on delivery:

Color:	clear to light yellow
Viscosity:	100 mPas
Odour:	little, ethereal
Mass density:	1.1 g/ml
Ph:	neutral
Shelf life:	12 months in closed containers
Consistency:	slow to medium flowing

Technical data:

Consumption:	depending on application
Shore:	not applicable

Application:

Apply the cleaner to a cloth of cotton or paper. After saturation with resin, the cleaner will be transformed into a hard substance. This material can then be disposed of as waste.

Safety:

Keep out of reach of children.
Cleaning agent for tools: water and soap.
