

## :: QUARTZ SAND

**Description:**

Is a washed and dried silica sand with good mixing properties for processing with polyester, epoxy or polyurethane resins. Available in 1 kg and 25 kg packaging.

**Application:**

Ideal as a sandstone imitation or in the processing of polyconcrete. Can best be used in combination with quartz flour.

**Data on delivery:**

Color:	beige
Viscosity:	not applicable
Mass density:	approx. 2,65 gr/cm <sup>3</sup>
Shelf life:	unlimited
Consistency:	powder-grain

**Technical data:**

Consumption:	depending on application
Shore:	not applicable

**Processing:**

Always mix both components before adding sand. Mix approx. 1-8 parts by volume of sand with 1 part of resin. Always make the mixture as thick as possible. This to prevent the resin from sagging.

**Safety:**

Is not a hazardous material.
