

## :: ECO LATEX THICKENER

### *Description:*

Is an additive for the latex moulding rubber. It is used to thicken the rubber without affecting the tear resistance or the quality of the final product.  
Available in 0.5 lt and 1 lt.

### *Application:*

By adding the thickener you can build up a layer thickness faster. The mixture sinks less quickly and is still easy to process.

### *Data on delivery:*

Color:	colourless
Viscosity:	600 MPa
Mass density:	approx. 1,0 gr/cm <sup>3</sup>
Shelf life:	12 months in closed packaging
Consistency:	liquid/thixotrope

### *Technical data:*

Consumption:	10-30%
Shore:	45

### *Processing:*

Mix the latex thickener under the latex rubber in a 10-30% ratio. Never use the thickener alone. Waiting time between coats: 20-25 min (depending on temperature).

### *Safety:*

Always provide appropriate protective clothing and gloves. Avoid prolonged skin contact. Cleaning agent for tools: ammonia or water.
