

## :: ACCELERATOR COBALT 1%

### *Description:*

Is a cobalt oxytrocopherate accelerator in a dibutylphtalate solution in a 1% solution. This is for the pre-acceleration of polyester resins, vinylester resins, top coats or gel coats. Available in 500 gr, 5 kg, 25 kg and 208 kg containers.

### *Application:*

As an accelerator for polyester resin in combination with a Mekp hardener. Can be added to already accelerated resins in order to obtain a faster hardening. Use the resin at temperatures from 5°C.

### *Data on delivery:*

Color:	purple
Viscosity:	25 mPas
Mass density:	approx. 1.05 gr/cm <sup>3</sup>
Shelf life:	6 months in closed packaging
Consistency:	liquid

### *Technical data:*

Consumption:	0.5 - 1.5 % by weight
Shore:	not applicable

### *Processing:*

Must be mixed with the polyester resin before adding the hardener. Never add directly to the Mekp hardener at risk of explosion or extreme reaction.

### *Safety:*

Always provide appropriate protective clothing and gloves. Avoid prolonged skin contact. Cleaning agent for tools: cleaner M (environmentally friendly substitute for acetone).
