

:: PREMIUM RELEASE AGENT

Description:

Is a release agent in paste form for processing at a high rate. Formulated to dry quickly. Very easy to apply and remove afterwards. Temperature resistant up to 140°C. Available in 450 gr packs. Is compatible with the PVA Partall Coverall.

Application:

As a basic wax for de-moulding in a polyester form both for new and used moulds.

Suitable for polyester and epoxy.

Can be applied in aluminium and steel moulds. The surface to be de-moulded must be dry before applying the release wax.

Data on delivery:

Color:	off-white
Viscosity:	20000 mPas
Mass density:	approx. 0,84 gr/cm ³
Shelf life:	18 months in closed container
Consistency:	paste

Technical data:

Consumption:	10 gr/m ²
Shore:	not applicable

Processing:

Always ensure a smooth and clean form. Apply with a soft cloth. Apply 4 to 6 thin layers. Wait 30 minutes between coats until the solvents have evaporated from the release agent. In case of a first de-molding, use the wax in combination with a PVA release agent (Partall Coverall).

Safety:

Always provide appropriate protective clothing and gloves. Avoid prolonged skin contact. Cleaning agent for tools: water and for hands: Slig (Stockhausen soap).
