

## :: Kevlar tape 270 G

### *Description:*

Is a reinforcement material used for the construction of laminates with polyester, epoxy and vinylester.

### *Application:*

For moulded parts in all applications including boat, car, construction and industry. Available in various widths. These fibres are characterised in particular by an increased E-modulus (better impact resistance).

Available in different sizes: 20-50 mm. Roll lengths of 50 lm.

### *Data on delivery:*

Color:	yellow
Viscosity:	not applicable
Mass density:	approx. 1,44 gr/cm <sup>3</sup>
Shelf life:	unlimited
Consistency:	solid

### *Technical data:*

Consumption:	depending on application
Shore:	not applicable

### *Application:*

Always used in combination with a resin. For higher strength, several layers should be applied on top of each other. Avoid prolonged contact with UV.

If the piece must be UV-resistant, use varnish.

### *Safety:*

Is not a hazardous material and may be treated as such. Always wear protective clothing and gloves.

Avoid prolonged contact with the skin.

Cleaning agent: water.
