

GIPSUM PLASTER BANDS 10 CM X 2.7 M 2 PIECES

Description:

Is a reinforcing material based on mesh bandage with synthetic gypsum. Used for the construction of counter or support moulds. Ideal for supporting or reinforcing silicone or latex moulds.

Application:

For the manufacture of support or counter moulds to support rubber moulds. Thanks to its fast-curing properties, it is ideal for printing with silicone on the skin. Available in rolls of 10 cm wide and 2.7 lm long. Packed per 2 pieces.

Data on delivery:

Color:	white
Viscosity:	not applicable
Mass density:	410 g/m ²
Shelf life:	unlimited
Consistency:	fixed

Technical data:

Consumption:	depending on application
Shore:	not applicable

Processing:

Immerse the roller in water for 5 seconds until the plaster is impregnated. Then apply 3 to 5 layers on top of each other, in order to obtain sufficient strength for smaller mouldings. If necessary, repeat the number of layers to obtain the desired strength.

Safety:

Is not a hazardous material and may be treated as such. Always wear protective clothing. Avoid prolonged contact with the skin. Cleaning agent: water.
