

## ::: SILICONE DEADNER

### *Description:*

Is a liquid additive for some special silicone rubbers. After mixing, you will obtain a thinner and softer rubber, without affecting the actual quality of the rubber itself. Makes the silicone rubber more flexible and of a more skin-like hardness. Available in 200 gr and 1 kg packs.

### *Application:*

As an additive for a.o. the Silskin 10. You keep the quality of the rubber, but you make it thinner and softer, to obtain a more skin-like structure. Has its application mainly in the manufacture of special effects in the theatre and film industry.

### *Data on delivery:*

Color:	colourless
Viscosity:	200 mPas
Mass density:	approx. 0.97 gr/cm <sup>3</sup>
Shelf life:	12 months in closed packaging
Consistency:	liquid

### *Technical data:*

Consumption:	5-30%
Shore:	not applicable

### *Processing:*

Mix 5-30% of the Deadner thoroughly under the A-component of the silicone rubber until the desired viscosity is reached. Then add hardener and mix thoroughly again. Addition affects the reaction slightly (slower).

### *Safety:*

Always provide appropriate protective clothing and gloves. Avoid prolonged skin contact. Cleaning agent for tools: cleaner M (environmentally friendly substitute for acetone).
