

: POND CONSTRUCTION KIT - PROMO ACTION

Description:

Is a set with all materials and supplies for the self-construction of a pond or swimming pool in glass fibre reinforced polyester, including all necessary tools. Available in a set of <10 m², <20 m², <40 m² and <80 m².

Application:

Construction system for the self-construction of a pond or swimming pool in glass fibre reinforced liquid polyester resin. This lining can be applied on concrete, screed, cement, wood and quick building stone. In addition to strengthening and reinforcing the substrate with the covering of polyester resin and glass fibre, the topcoat makes the whole thing waterproof.
