

:: VACUUM BLEEDER BLACK 105 G/B100

Description:

Is an HD-PE mesh as a medium flow mesh and to optimise flow during the vacuum or infusion process. Can be applied in multiple layers to improve flow. Available in 100 mm width and 100 lm rolls or per square metre.

Application:

Used in vacuum technology for faster evacuation of air from the laminate and faster flow of the resin in the vacuum or infusion system. Has a temperature resistance of 100°C

Data on delivery:

Color:	black
Viscosity:	not applicable
Mass density:	100 g/m ²
Shelf life:	unlimited
Consistency:	fixed

Technical data:

Consumption:	not applicable
Shore:	not applicable

Processing:

Used in the vacuum technique after applying the laminate and before the foil. Should be removed afterwards.

Safety:

Cleaning agent for tools: water and soap.
Is not a hazardous material.
