

:: KEVLAR TAPE 200 G

Description:

Is a reinforcing material used for the construction of laminates with polyester, epoxy and vinylester.

Application:

For moulded parts in all applications including boat, car, construction and industry. Available in various widths. These fibres are characterised in particular by an increased E-modulus (better impact resistance). Available in different sizes: 25-50 mm. Roll lengths of 50 lm.

Data on delivery:

Color:	yellow
Viscosity:	not applicable
Mass density:	approx. 1,44 gr/cm ³
Shelf life:	unlimited
Consistency:	solid

Technical data:

Consumption:	Depending on application
Shore:	not applicable

Processing:

Always used in combination with a resin. For higher strength, apply several layers on top of each other. Avoid prolonged contact with UV.
If the piece must be UV-resistant, use varnish.

Safety:

Is not a hazardous material and may be treated as such. Always wear protective clothing and gloves.
Avoid prolonged skin contact.
Cleaning agent: water.
